

INTERNSHIP TOOLKIT FOR STUDENTS

If you're looking for an internship or research project in Groningen, Friesland or Drenthe, Make it in the North.nl is here to help you out! In 3 steps, and a bunch of tips and tricks, we'll set you up for success.

1 Look for an interesting position

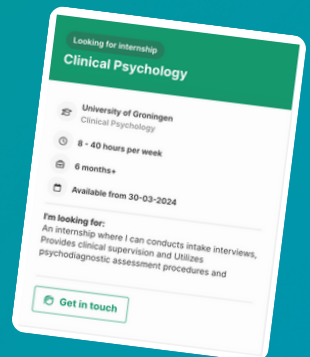

Throughout the year, companies and organisations post internship opportunities on our website.

Enable the filter “internship” on makeitinthnorth.nl/jobs or head straight to our internship board on makeitinthnorth.nl/internship-board.

2 Post a card on Make it in the North Internship Board

Let companies know what you're looking for. Post your own internship card on makeitinthnorth.nl/internship-board — include your study background and the type of tasks or research topics you would like to dig into.

Contact companies to ask for an opportunity

All companies on Make it in the North are open for internationals, so have a look at which companies seem interesting to you. Many of these organisations have projects lying on the shelf that they don't actively recruit for, but they're happy for the projects to get done if a suitable candidate presents themselves. Hint: that's you!

Some Tips & Tricks!

- No idea what company fits your style? Use the Company Culture Matchtool to see which companies share your values and are organised in a way that suits you: makeitinthnorth.nl/matchtool
- Tailor your application to the company (and the internship position). If you copy paste your motivation letter, you greatly reduce your chances of getting invited for an internship.
- Many educational institutions provide free career skill workshops to students. Check in with the Career Services of your institution for CV checks, LinkedIn workshops and interview training.
